

Dear Students!

Important information about the „Study of phosphatases” Molecular Biology Practice

- **Date:** „Studies on phosphatase”: week 11-13.

(check the exact time of the practicals in the „schedule of practicals” on our website)

- **Location:** Theoretical Building downstairs, in the practical room of the Biochemistry and Molecular Biology Department (next to the Medical Chemistry practical room)

- Please arrive in time!

- **You have to bring:**

- lab. coat

- calculator

- pencil

- pen

- ruler

- student card

- „Practical guide” and „practical notes” about the „Studies on phosphatase” practical, can be downloaded from our website (<http://bmbi.med.unideb.hu>)

Education/General medicine, dentistry/Molecular Biology/Information about practices

- **Read the practical guide** of the „Studies on phosphatase” practical **at home**, before the practical!

You have to **write a note-book during the practical** (fill in the „practical notes” and write an evaluation about it) that must be given to the teacher at the end of the practical. It must contain the following parts:

- Each measured value

- Calculations and the steps of the calculations

- Graphs (on graph paper!)

- Detailed evaluation of the results

- You have to do the practical with your own group (where you registered at the Education Office). If you miss the practical because of any serious reason, you can make it with an other group during the three weeks practical period (week 11-13.). In case of a remedial practical you have to contact Dr. Szilvia Tőkés (tokes@med.unideb.hu) and fix the date at least 3 workdays before the remedial practical. Out of this period you can not remake it.
If you don't do the practical, we can't accept your semester!
