

1st year students (GM, Dent.) Molecular Biology

Signature of the lecture book: Signature (acceptance of the semester) is not needed in the new (green coloured) lecture books. The old type (black) lecture books have to be signed, but you should bring it only for the exam, it will be signed for the following day.

Offered grades:

The offered grades have to be registered into the lecture book on 19th May (Thursday) LSB F. 015-016:

13:00-13:15 o'clock: Gr. 1, 2, 3, 4

13:15-13:30 o'clock: Gr. 5, 6, 7, 8

13:30-13:45 o'clock: Gr. 9, 10, 11, 12, Dentists

The offered grades can be accepted only personally.

If you don't register your offered grade on this day, it is automatically erased (your group mates can register your grade instead of you, if they have a letter about it with your signature).

There is no possibility to change the collected points after 19th May.

Offered grades have to be accepted on the Neptun, too!

We will register the offered grades into the Neptun until 20th May 4 p.m.

You have to accept the offered grade on Neptun until 23rd (Monday) 4 p.m.

If you don't register it until this deadline, you will lose it.

(On the first exam date improvement exam can be taken only with a request letter. The printed and signed letter have to be delivered until 23rd Monday 4 p.m. into LSB 3.101 education office.)

Grade for the semester exam will be offered on the base of the collected points, for all those students who collected at least 60 points from the total points. Grades: 2 (pass) 60-69.5 points, 3 (satisfactory) 70-79.5 points, 4 (good) 80-89.5 points and 5 (excellent) 90-100 (+6) points.

You can improve the offered grade once in the exam period (on the improvement exams, we always count the better grade, so you can not lose your offered result).

Those students who did not collect 60 points, have to take a written exam in the exam period.

Molecular Biology exam dates:

Week 1.: 25th May (Wednesday) GM+ Dent.

Week 2.: 1st June (Wednesday) GM+ Dent.

Week 3.: 8th June (Wednesday) GM+ Dent.

Week 4.: 15th June (Wednesday) GM+ Dent.

Week 5.: 22nd June (Wednesday) GM+ Dent.

Week 6.: 29th June (Wednesday) GM+ Dent.

Week 7.: 6th July (Wednesday) GM+ Dent.

Registration for the exam:

On the NEPTUN, till 12:00 a.m. on the previous workday.

Time and place of the exam:

On exam days students have to go at 8:30 a.m. to the place of the test writing. List of the places and names will be hanged on the information board of the department (LSB downstairs, 1st corridor), on the previous day at 4 p.m. You have to go to that lecture hall, where your name is written in the list.

For the exams you have to bring lecture book and student card. You can start the exam if you are registered for the exam date on the NEPTUN!

Results: depending on the number of students we will announce it in the afternoon of the exam day or on the following day morning. The exact time and place will be announced at the beginning of the test. You can check your test only at that time.

Postponement:

Through the NEPTUN system, **till 24:00 two working days before the exam.**

If you are registered for an exam day, but you don't come, you will lose a chance.

Improvement exam:

Students can take one improvement exam in the exam period. We always count the better grade! Both the offered grade and exam grade can be improved.

Semester exam:

„A”, „B”, and „C” chance exams are all written exams, but if you fail on the „C” chance exam you will get oral questions, too.

The test includes 40 single choice test questions, each correct answer worth 1,25 points (max. 50 points together). At least 30 points (60 %) must be collected for a passing grade. Grades are increased by five points: 30-34.5 pass; 35-39.5 satisfactory; 40-44.5 good; 45-50 excellent.

Collecting points for the 2nd year final exam:

Those students who collect at least 220 points (Dentistry students: 210 points) during the three semesters taught by the Department of Biochemistry and Molecular Biology, and have at least 60 points (Dentistry students: 55 points) from each of the three semesters (Molecular Biology, Biochemistry I., Biochemistry II.) will be exempted from having to write a written part of the biochemistry and molecular biology final exam.

Exam results are also counted in the point collecting system (points are multiplied by two in this case).
